Cover story: The new PRINTER from COLOP – unique as you!

2014 will see the launch of the seventh generation of COLOPs best-selling self-inking stamp, an impressive development due to its unique, modern design and numerous technical innovations and enhancements.

The real highlight is the opportunity to create the design for the XXL image window. It covers almost the entire stamp and therefore offers boundless creative possibilities. Whether used for photos, QR codes, company logos or text, COLOP's best-selling product always provides the right solution for almost all

requirements. To support this, COLOP has developed two new interesting software tools for the B2B sector and end users, allowing the extra-large ImageCard™ to be personalised on both the front and the rear.

Ernst Faber (CEO of COLOP): "With these two options, COLOP is adjusting itself to the change in consumer behaviour when it comes to stamps. Individual, personal creations are what end users want."
